

Table 5: Learning styles

Make notes about activities you observe in the classroom which use the learning styles below:

	<b>Math</b>	<b>Science</b>	<b>Reading</b>	<b>Other</b>
<b>Auditory</b>	Listen to the teacher(lecture)	Listening to a story about Frog life cycle.	Listen to a story	.
<b>Visual</b>	Watch a video about addition	Watching a video about plant life cycle	Watch a movie that tells a story	Watching a role play
<b>Kinesthetic</b>	Using play dough and making numbers	Planting a flower in the school play ground	Reading a story and afterwards Touching objects related to the story	Participating in a Role Play

**Answer the following questions:**

- Which learning styles did all the children seem to enjoy and **why**?

**Kinesthetic, because children enjoy doing hands on Activity's.**

- Why do you think the teacher incorporates a variety of learning styles for the children?

**Because each child understands differently, some children learn faster when the learning style suits their preferred learning style.**

- Notice which activities are repeated with a variety of learning styles e.g. read a story, listen to a story, act the story, draw the story. Can you find other examples e.g., math or science.

**In Science the Teacher lets children Draw the stories of Animal life cycle or the plant life cycle, because she believes that when children draw the information sticks in their mind and it becomes hard to forget.**

- How can teachers improve student learning by using a range of learning styles?

**By using range of different learning styles children will be trained from every angle and it will be exciting. Children will not get bored easily and they will be more involved because there will be variety of different learning styles that suits everyone.**
